### TEMPLATE FOR ASSESSMENTS

- 1. Read Guidelines in case of any doubt check with your mentor.
- 2. The final submission will have to be in soft copy in MS word as per template shared below.
- 3. Use Calibri font size 9
- 4. Keep Questions short and crisp. Word count should not exceed 20 words for questions and 8 words for options.
- 5. In the last row mention the correct option as a) or b)
- 6. The Blooms level has been fixed so please design question accordingly.
- 7. The rows heights have been fixed, so that the table size is not changed. If you have any problem, use this link to learn how to fix it <a href="YouTube">YouTube</a>

### Assessment Type: Practice Worksheets: End of CO: in LMS/ downloadable PDF

If students have access to laptop/desktop – they can answer it on LMS, else download it and answer it and file it for later use. They can also copy the question in their notebook in case the space provided is insufficient.

- 1. Best suited for subjective questions.
- 2. Numerical problems
- 3. Short answer questions

| A. Question Space  Prove: $\frac{1 - \tan 2A \cdot \tan A}{1 + \tan 2A \cdot \tan A} = \frac{\cos 3A}{\cos A}$ | B. Question Space $\operatorname{Show\ that\ } \tan\left(\frac{\pi}{4}-\ \theta\right)=\frac{1-\tan\theta}{1+\tan\theta}.$ |
|--|--|
| A. Answer Space  | B. Answer Space  |

C. Question Space Prove:  $\frac{\sin(A-B)}{\cos A \cdot \cos B} = \tan A - \tan B$ 

### D. Question Space

If tan(x+y) = 3/4 and tan(x-y) = 8/15 then find

Ans:  $tan 2x = \frac{77}{36}$ 

### C. Answer Space

# D. Answer Space

E. Question Space Prove:  $\frac{\cot A - \cot 2A}{\cot A + \cot 2A} = \frac{\sin A}{\sin 3A}$ 

F. Question Space If  $sinA = \frac{-5}{13}$  and  $cosB = \frac{-7}{25}$  and  $\angle A \& \angle B$  both lies in third quadrant, find sin (A – B).

Ans:  $-\frac{253}{325}$
